SEMINOLE BASEBALL...

A Winning Tradition

A winning tradition. It doesn't start with 100 years. It doesn't start with great facilities, a warm location, a new conference or even challenging competition.

A winning tradition is all about people. It is people — from players and coaches to fans and administrators — who make a winning tradition.

From the days of first FSU coach Charlie Armstrong, who guided the first Seminole team to a winning record in 1948, to Coach Danny Litwhiler and All-America shortstop Dick Howser, who led the 1957 Seminoles to FSU's first College World Series...

From the 1965 team that featured a young centerfielder named Mike Martin and advanced to Omaha, to the 1970 team that came within an eyelash of winning it all, losing 2-1 in extra

innings in the final game...

From another World Series trip in Mike Martin's first year as head coach in 1980, through the Golden Spikes Awards of Mike Fuentes and Mike Loynd...

From the 1986 team that advanced to the championship game of the CWS and boasted a trio of All-Americans, to the overachieving group of 1991 that came out of nowhere to post the longest winning streak in school history, hold onto the No. 1 spot in the polls for nine weeks and make FSU's fourth trip to the national championship in the past six seasons...

People have made Seminole baseball a winning tradition. In 44 seasons of intercollegiate play, through six decades and eight head coaches, Florida State has never had a losing baseball season. The Seminoles have made 14 consecutive trips to NCAA Regional competition, the second-longest current string in Division I baseball. Since 1948, 29 of FSU's 44 teams have advanced to NCAA Regional/District competition. Eleven times, Florida State squads have won those tournaments to play in the College World Series.

In addition to the achievements of Florida State teams, Seminole players have picked up plenty of individual awards. Forty-two FSU players have earned All-America recognition; that list includes 22 first-team selections. Last year, catcher Pedro Grifol became FSU's first first-team All-American since 1987. A pair of Seminole standouts — Mike Fuentes in 1981 and Mike Loynd in 1986 — won the Golden Spikes Award, presented annually to the top amateur baseball player in the country. Two others — Terry Kennedy in 1977 and Jeff Ledbetter in 1982 — were named Player of the Year.

From success at Florida State to success in the pros. Over 120 Seminoles have signed professional contracts after leaving FSU. In the past two seasons alone, Florida State has sent 13 players into professional baseball. Last year, Eduardo Perez became the sixth Seminole chosen in the first round of the major league baseball draft.

The 24-man list of Florida State stars who went on to play in the major leagues ranges from past major leaguers Ken Suarez, Woody Woodward, Jim Lytle, John Grubb and Juan Bonilla to current pros Jody Reed, Paul Sorrento, Luis Alicea and Deion Sanders. More former Seminoles are working their way up the professional ladder.

Like their team, Seminole fans are among the nation's best. Some of the most knowledgeable and loyal baseball fans can be found in Dick Howser Stadium. Florida State enjoys the support of the entire University and Tallahassee communities, a fact proven by astronomical attendance figures. In 1991, for the second consecutive season, over 100,000 fans packed the stadium for 40 home games. The season average of 2,739 fans per game was an all-time high.

With that type of fan interest, Florida State baseball attracts extensive media coverage around the state and around the

Junior Chris Roberts, the highest draft choice ever to attend Florida State, starred for Team USA last summer.

nation. FSU baseball is page one news in Tallahassee, and 10 major newspapers in Florida cover the Seminoles on a daily basis. National baseball publications keep weekly tabs on the Tribe as well, as evidenced by Florida State's number one ranking throughout most of 1991.

FSU fans follow the Seminoles whether the team is at home or on the road. This year, Florida State boasts the most extensive radio package in college baseball. Every game, home or away, will be broadcast live across the Tallahassee area this season.

Media coverage of the Seminoles extends to the television screen. In the past three seasons, over 30 Florida State games have been broadcast on cable networks across the Southeast and across the country. Already, 15 games have been scheduled for broadcast in 1992, including all 10 of Florida State's games against in-state rivals Florida and Miami. The Sunshine Network, the network of Florida State sports, will carry nine FSU home contests to its 2.5 million homes in the state of Florida and across a seven-state area. Local TV stations offer extensive coverage of the team, beginning in January with preseason practices and continuing through tournament time. "Seminole Uprising" and "The Mike Martin Show", a pair of half-hour shows focusing on Seminole baseball, air twice weekly, on statewide cable and on local television.

While the Florida State baseball winning tradition began long ago under the first Seminole coaches, there is no question that tradition has reached unprecedented heights under current head coach Mike Martin. In his 12 seasons as head coach, Martin has led Florida State to five College World Series appearances, including four in the last six years. All 12 of his teams have appeared in NCAA Regionals, and all 12 have won at least 50 games, an unmatched mark in college baseball. Martin-coached FSU teams have won over 75 percent of their games. His career record of 665-219-3 makes Martin the fifth-winningest active coach in Division I baseball.

Seminole players are afforded every opportunity to give their best — both on the field and in the classroom as the Florida State coaching staff and administration stresses pursuit of excellence in both baseball and academics. To help balance the two, all FSU student-athletes work with the academic support staff, which provides tutorial assistance, career development, scheduled study hall sessions and computer facilities. One of the Seminole assistant coaches works closely with the academic support staff to monitor class attendance and resolve any conflicts that arise with scheduling, travel, etc. during the season.

While facilities don't make the great Seminole baseball winning tradition, tradition has made the facilities great. Dick Howser Stadium is simply one of the finest college baseball stadiums in the nation. The setting, with pine trees lining the rightfield wall, a 2,500-seat concrete grandstand and bleacher seats along both lines, is beautiful. The playing field itself is meticulously groomed year-round.

Recently, a two-year project was completed underneath

Seminole celebrations like this one have become commonplace over the years.

the stadium which made it truly a player's ballpark. Behind the Seminole dugout is a one-year-old lockerroom and clubhouse facility. The spacious, carpeted rooms include a large player lockerroom area with stereo system, a separate coaches' dressing room, an office with video equipment where players and coaches do videotape analysis, and a training area/weight room.

This fall, the completion of the Seminole Baseball Tradition Room finished the project. The Tradition Room is an attractive lounge area with big screen television which houses trophies, photos and plaques depicting Florida State's baseball success. Replicas of the Golden Spikes Awards of Fuentes and Loynd are prominently displayed, as are past tournament and conference championship trophies. One wall of the Tradition Room is devoted to FSU's Players in the Pros, All-Americans and College World Series teams.

The Moore Athletic Center adjacent to Dick Howser Stadium houses the Seminole weight room and training complex, in addition to the baseball coaches' offices. In the state-of-the-art weight room, FSU baseball players have the opportunity to get stronger, faster and more flexible under the direction of strength coach Dave Van Halanger and his assistants, who run an off-season program for Seminole athletes. In the training room, athletes receive the finest care from the professional training staff, led by head trainer Randy Oravetz.

In the past 44 years, thousands of coaches, fans and administrators have contributed to the winning tradition of Seminole baseball. But it is Florida State's players who have built that tradition, one person at a time, one season at a time.

People — that's what makes a winning tradition. That's what makes Seminole Baseball.

DICK HOWSER STADIUM

The home of the baseball Seminoles is beautiful Dick Howser Stadium on the campus of Florida State University. Since its opening in 1983, the stadium has provided hundreds of thousands of Seminole fans with the perfect perch from which to watch the finest college baseball action. Additions and improvements over the past 10 years, both to the internal and external sides of the stadium, have made it one of the best facilities of its kind in the country.

With the completion of the Seminole Baseball "Tradition Room" this fall, the stadium now holds an attractive showcase which tells the story of the great players, award winners, and tremendous teams of the past. Trophies and plaques depicting Florida State's baseball success through the years adorn the walls. The room also serves as a comfortable lounge area adjacent to the FSU lockerroom, complete with VCR and big-screen television, where Florida State players can relax before and after games. (See box.)

Dick Howser

The addition of the Tradition Room this year completes a two-year project underneath Dick Howser Stadium which made the facility truly a "player's ballpark" with drastic changes unseen by most fans.

For the second season, Florida State's players and coaches enjoy the convenience and luxury of a clubhouse and lockerroom behind the Seminole dugout. The main lockerroom area is fully-carpeted and contains personalized lockers for each player, a separate lockerroom for the Seminole coaches, a video area where FSU players and coaches do videotape analysis and a

Beautiful Dick Howser Stadium has been the home of the Florida State baseball Seminoles since 1983. The concrete grandstand area seats 2,500 with room for another 2,500 in bleacher seating down both lines.

FSU'S TOP CROWDS

coaches' office. A built-in stereo system blares the players' latest favorites. Adjacent is a room which doubles as a weight and training area, complete with weight lifting machines.

These latest "internal" improvements are only the latest of an ongoing effort to keep Dick Howser Stadium among the elite of college baseball. Externally, the stadium has also seen many improvements. These changes have included: addition of a screen to the top of the right field wall, addition of a roof to the grandstand and a state-of-the-art electronic scoreboard, complete with message center.

Dick Howser Stadium, named after the late Kansas City Royals and Florida State manager who was also FSU's first baseball All-American, is a showcase befitting one of the top collegiate teams in the nation. From the beautifully manicured playing surface to the chairback seats and modern press box, Howser Stadium is one of the best places in the country to watch a game.

Early in 1993, the one-millionth fan to watch a game there will walk through the gates of Howser Stadium in only its 11th season of operation. Last year, nearly 110,000 fans came through the turnstiles in FSU's 40 home dates, including tournament games. That averaged out to 2,739 per game, the highest average in stadium history.

Florida State recorded five of its Top 10 crowds of all-time last season, including the second and third-largest marks in Tribe baseball history as over 6,000 fans turned out on successive nights against the University of Miami. The three-game total of 17,811 for that series established a new FSU mark for a three-game set. The Seminoles have recorded seven of their top 10 attendance games of all-time over the past two seasons and ranked in the top 10 nationally in attendance both years.

Florida State fans are simply the best and most knowledgeable in college baseball. Although they live and die with "their" Seminoles, the FSU faithful are known nationwide for their sportsmanship and appreciation of good baseball by both teams, as well as their sometimes "creative" brand of support. They, along with the stadium and a professional game operation, are a large reason Dick Howser Stadium has been the site of eight

NCAA Regional tournaments in the nine years since its opening in 1983.

The stadium was dedicated in honor of Dick Howser in March of 1988, prior to an exhibition game between Florida State and the Kansas City Royals, two of Howser's former teams. As part of the Stadium dedication, Kansas City all-stars George Brett and Bo Jackson helped unveil a new \$150,000 matrix scoreboard and a bronze bust of Howser. Both items were permanent additions to the facility.

Old Seminole Field was christened Seminole Stadium March 28, 1983, after over one million dollars of renovations were completed on the park. Wooden bleachers were replaced with a two-tier concrete grandstand seating 2,500, modern concession areas and restrooms were installed, and a press box complete with separate booths for radio and television broadcasts was added. The lower level seating is arranged like box seats, while the upper level has metal bleachers with chair backs. All 2,500 grandstand seats annually sell out. Additional seating down both lines provides 2,500 more seats. Nearly 1,000 seats are available for overflow crowds, and the park was designed to allow for future expansion if necessary.

The playing surface dimensions measure 320 feet to rightfield, 400 feet to center and 340 feet to left. Prior to the 1986 season, a screen was added to the top of the rightfield wall; it went up from the 10-foot wall, increasing in five-foot increments from 20 feet in the power alley to 30 feet in rightfield — giving a unique effect.

A matrix board, which provides lineups, statistics and messages throughout the game, a high quality public address system, modern concession stands and vendors circulating the stands give Howser Stadium a "big league" look.

The playing field itself is often compared to that of a major league park. Long-time FSU grounds chief Robert Barrett and assistant coach Brian Rhees personally oversee the everyday upkeep of the playing surface and surroundings, spending hours on the field year-around. The hours of hard work put in by Barrett and his ground crew are often taken for granted, but they give Dick Howser Stadium a playing field unsurpassed by any other in the nation. During the season, Rhees is charged with overseeing readiness of the field for each day's contest.

The beautiful home of Florida State's baseball Seminoles, from the new Tradition Room, clubhouse area and lockerroom, to the top-notch playing field, chairback seats and overall family atmosphere, is indeed a fitting tribute to one of FSU's greatest alumni, Dick Howser.

Seminole Baseball Tradition Room

The latest addition to Dick Howser Stadium is the Seminole Baseball Tradition Room. A beautiful area adjacent to the FSU clubhouse and lockerroom underneath the stadium, it holds an array of FSU baseball memorabilia and trophies which tell the story of Florida State baseball success.

Separate wall displays, attractively backlit, are devoted to Florida State All-Americans, former Seminoles in the Pros, and FSU's 11 College World Series teams. Another wall is lined with FSU's most recent tournament and conference championship trophies, as well as replicas of the Golden Spikes Awards of Mike Loynd and Mike Fuentes.

Another corner contains a VCR and large-screen television where players can enjoy the latest videos. Couches line the room to provide a comfortable area for relaxing viewing.

The Seminole Baseball Tradition Room, built thanks to the generous donations of Florida State former baseball players, friends and alumni, gives Seminole players an area in which to relax before and after games and practices, and serves as a showcase for the great tradition which is Florida State baseball.

SEMINOLES IN THE PROS

Florida State continues to provide a pipeline to professional baseball, annually sending the top talent off successful Seminole squads to professional clubs via the major league draft. Last year, six members of FSU's College World Series team were drafted and signed by major league teams, including Eduardo Perez, a first-round pick of the California Angels and the 17th choice overall. Perez became the sixth Seminole ever chosen in the first round. Just a few picks later, pitcher Jimmy Lewis was selected in the second round by the Houston Astros to give the Seminoles their highest pair of draft choices in several years.

Since the major league draft was instituted in 1966, 123 Florida State players have signed contracts with major league teams. Twenty-four former Seminoles have gone on to play in the pros while others, like the late Dick Howser and Woody Woodward, have become successful coaches and administrators on the major, minor and collegiate levels.

A listing of current Seminoles in the pros includes Terry Kennedy of the San Francisco Giants, Jody Reed and Jeff Gray of the Boston Red Sox, Paul Sorrento of the Minnesota Twins,

Luis Alicea of the St. Louis Cardinals and the Atlanta Braves' Deion Sanders. Reed and Gray, now Red Sox teammates, were co-captains of the 1984 FSU squad and Sorrento was a member of the Minnesota Twins' World Champion squad in 1991. Sanders, a two-sport star in Atlanta, helped the Braves on their improbable march to the 1991 playoffs.

Other Florida State products are poised on the brink of the majors as Seminole players enter the draft well-prepared and make quick ascents to the major leagues. Pitcher Mike Loynd and Alicea are prime examples of that preparation. Loynd pitched in his first game as a Texas Ranger in 1986, just six weeks after coming out of Florida State as the Golden Spikes Award winner. Alicea was the second player to reach the majors out of the draft in 1986, as the St. Louis Cardinals second baseman.

Below is a year-by-year listing of the Seminoles who signed professional contracts out of Florida State and the teams with which they signed.

Former FSU second baseman Luis Alicea battled back from injury problems to earn a spot on the St. Louis Cardinals' roster in 1991.

FLORIDA STATE

UNIVERSITY

THIS IS FLORIDA STATE

Florida State University, nearing its golden anniversary as a coeducational graduate research institution, is poised on the brink of joining the nation's academic elite.

Building rapidly from the framework of a highly regarded liberal arts college for women, located on the oldest continuous site of higher education in Florida, the University has emerged as an institution of national and international esteem, evidenced by a number of exciting recent additions to its record of excellence:

- FSU, selected over the Massachusetts Institute of Technology, attracted the National High Magnetic Field Laboratory to Florida's capital city. The National Science Foundation will establish the \$100 million, state-of-the-art magnet lab at FSU, which will be joined in the research by the Los Alamos National Laboratory and the University of Florida.

- At the forefront of super-computing since obtaining its first high-speed computer in 1985, FSU took yet another step in ultra-fast computing with the acquisition of two new supercomputers, the Thinking Machine Corp. Connection Machine and the Cray Y-MP. Both computers can be accessed from hundreds of locations in the United States and Europe.

- In 1991, Florida State ranked second in popularity nationwide among high school seniors, based on the number of students who request that their college entrance exam scores be sent to an institution. FSU was one of only three institutions among the top 15 choices of both black and white college bound students.

- FSU's high-tech program in structural biology in 1991 received the university's largest single foundation grant to date, \$4 million, to position it among the leaders in the field worldwide.

- Now the professional training ground for one of Florida's fastest growing industries, film production, FSU graduated its first class of film students from its School of Motion Picture, Television and Recording Arts in 1991.

- Construction of the \$75 million University Center is underway adjacent to Doak S. Campbell Stadium. When completed, the University Center will provide 550,000 square feet of classroom and office space and a centralized location for student services. The three-phase project will include two eight-story buildings and three four-story buildings on the east and west sides of the stadium.

- And, in 1991, Florida State, after being courted by several national athletic conferences, joined the Atlantic Coast Conference as its ninth member, capping more than a decade of national prominence in intercollegiate athletics.

As this list attests, Florida State has begun the 1990s with exceptional strength, energy and vision for the future. Under the new leadership of the university's 11th president, Dr. Dale W. Lick, FSU will continue to build on the foundation of its long history of excellence in scholarship, research and humanity.

A public university and a senior member of the State University System, Florida State was founded as an institution of higher learning in 1851 by legislative act and began operating in Tallahassee with its first students in 1857.

The main campus is spread over 347 acres in Tallahassee; the University owns a total of 1,172 acres in Leon, Bay and Franklin counties. For many years, FSU has extended its reach

far beyond Florida through international study programs in England, Italy, Switzerland, Yugoslavia, France, Panama, Costa Rica and the Caribbean.

These far-reaching programs are but a few of the 271 graduate and undergraduate degree programs offered through Florida State's eight independent colleges — Arts and Sciences; Business; Communication; Education; Engineering; Human Sciences; Law; and Social Sciences (incorporating the School of Public Administration and Policy) — and eight independent schools — Criminology and Criminal Justice; Library and Information Studies; Motion Picture, Television and Recording Arts; Music; Nursing; Social Work; Theatre; and Visual Arts and Dance.

With 1,533 members, the FSU faculty currently includes five members of both the National Academy of Sciences and the American Academy of Arts and Sciences, and has included five Nobel laureates. The main library facility, the Robert M. Strozier Library, is linked via a computerized information system to other state university and national research libraries. The Paul A.M. Dirac Science Center Library places scientific resources close by the university's main science research complex.

On the top floor of the Dirac Library is the headquarters of the Supercomputer Computations Research Institute, a multidisciplinary, multinational program that brings together some 100 scientists, engineers and technicians. SCRI is electronically linked to an off-campus research complex and the university's two powerful supercomputers.

Also providing unique research opportunities is the physics department's Tandem Van de Graaff Superconducting Accelerator Laboratory, which houses two powerful atom smashers and is ranked among the top four in the nation by the National Science Foundation.

FSU places a high priority on its nearly 29,000 students, their needs and interests. The Honors and Scholars program, the FSU Distinguished Lecture Series, student government, the one-of-a-kind, all-collegiate Flying High Circus, and intramural sports are among more than 200 organizations and activities in which students can participate.

In the heart of the state's thriving capital city, Florida State bonds the educational and social aspects of campus life just as it blends Gothic and modern styles of architecture with the oaks, pines, dogwoods, palms and azaleas of North Florida.

In all areas of teaching, research and service, Florida State University is advancing boldly into the 21st century.

ADMINISTRATION

DR. DALE W. LICK PRESIDENT

Dr. Dale W. Lick became the 11th president of Florida State University on Aug. 1, 1991. He heads an institution with an enrollment of 29,000 students and an operating budget of \$400 million.

Lick had served as president of two institutions of higher education, the University of Maine and Georgia Southern College (now Georgia Southern University), prior to his selection by the Florida Board of Regents as FSU president on March 11, 1991.

A mathematician by academic discipline, Lick also previously held administrative positions at Old Dominion University, Russell Sage College and Drexel University.

Like his predecessor, Dr. Bernard F. Sliger, who retired as FSU president after 15 years, Lick is a native of Michigan and an alumnus of Michigan State University. Lick was born Jan. 7, 1938, in Marlette, Mich.

At Michigan State University, Lick earned a bachelor of science degree in 1958, graduating in three years with honors, and a master of science degree in 1959, both in mathematics. He earned a Ph.D. in mathematics from the University of California at Riverside in 1965.

After completing his doctorate, Lick joined the faculty at the University of Tennessee, Knoxville, as an assistant professor of mathematics. Two years later, on leave

from UT-Knoxville, he was a visiting research mathematician at Brookhaven National Laboratory in New York. He returned to UT-Knoxville as a tenured associate professor of mathematics.

In 1969, Lick became head of the department of mathematics at Drexel University in Philadelphia, Pa., while at the same time serving as an adjunct associate professor in biomathematics at Temple University Medical School. From 1966 to 1971, he was also a consultant to the Computing Technology Center of Union Carbide Corp. for Oak Ridge National Laboratory.

Lick moved to Troy, N.Y. in 1972 to serve as vice president for academic affairs at the private Russell Sage College. Two years later, he was named dean of the School of Sciences and Health Professions and professor of mathematics and computing sciences at Old Dominion University. He headed the largest of the Norfolk, Va. university's five academic schools for four years.

From July 1978 to September 1986, Lick was president of Georgia Southern and a professor of mathematics and computer science, and helped lead the Statesboro institution from a teachers' college to university status.

On Sept. 1, 1986, Lick became president and professor of mathematics at the University of Maine located in Orono, a

land-grant university and Sea Grant College, the largest of the seven institutions in the University of Maine System.

Florida State's 11th president has been married since 1956 to Marilyn K. Foster. The Licks have three grown children, Kitty, Diana and Ronald.

BOB GOIN ATHLETIC DIRECTOR

Bob Goin was named athletic director at Florida State in January of 1990 after eight years at the school.

Goin and former FSU President Bernard Sliger are widely credited with making the single most important move in the school's athletic history when

Florida State joined the Atlantic Coast Conference on July 1, 1991. By implementing one of the nation's top compliance programs, spearheading the development of athletic facilities and committing himself to continuing FSU's unprecedented successes both on and off the field, Goin has proven himself an excellent leader in less than two years at the helm of FSU's athletic department.

Among his many national responsibilities, Goin serves on the powerful College Football

Association Television Committee and on the Atlantic Coast Conference Television Committee.

An assistant and then associate athletic director at Florida State from 1982-90, Goin was responsible for most aspects of the day-to-day operation of the department. Among his many duties was the responsibility for all game-day operations for the Seminole football, basketball and baseball teams. He worked as tournament director for seven NCAA baseball regionals.

Goin came to Tallahassee in July of 1981 after two years as athletic director at California (PA) State College, where he was credited with expanding the athletic department. During his time there, he formed the Cal State Athletic Scholarship Fund and Athletic Booster Club.

Prior to taking the California post, Goin served as assistant athletic director at West Virginia University. From 1976-79, Goin was involved in several expansion projects at WVU, including construction of a new stadium and athletic facility.

From 1960-76, Goin worked at Bethany College, where he held a variety of positions. He was an associate professor and chairman of physical education and athletics at Bethany, as well as taking coaching assignments in football, basketball and baseball.

A recipient of a number of coaching honors, Goin currently serves on many university-wide committees. As a member of the Compliance Committee, Goin has developed and implemented a program which protects the integrity of the university by making sure each and every regulation governing intercollegiate athletics is followed.

Goin and his wife, Nancy, have three sons, a daughter, and two grandchildren.

CHARLES W. EHRHARDT FACULTY ATHLETIC COMMITTEE CHAIRMAN

In the middle of his eighth year as Chairman of the FSU Athletic Committee, Charles Ehrhardt continues to be an important voice for Florida State on the national level. Recently, Ehrhardt was appointed by NCAA Executive Director Dick Schultz to serve on the National Collegiate Athletic Association's Special Committee which reviewed the NCAA Enforcement and Infractions process.

Twice elected president of the Metro Conference, Ehrhardt has served as chair of the Faculty Athletics Representatives Association and has been a member of the College Football Association's Monitoring Committee since 1989.

This is Ehrhardt's second stint on FSU's Athletic Committee. A professor of Law at Florida State since 1967, he first worked on the committee from 1969-71. He was reappointed to the board in 1983 and succeeded Dr. James Jones as chairman in 1984, becoming Florida State's representative to the NCAA with the appointment.

A highly-respected expert in the field of Evidence, Ehrhardt is the Ladd Professor of Evidence in the Florida State College of Law. He wrote the Florida Evidence Code, passed by the state legislature in 1976, which deals with the admissibility of evidence in court trials. Ehrhardt has also written a book on evidence, which is now in its third edition.

Ehrhardt is in demand as a lecturer and speaker. He works with lawyers and judges nationwide as a private consultant on evidence matters. He currently teaches in the areas of torts, evidence, trial advocacy and sports law. He has been honored four times as the outstanding professor in FSU's College of Law and also was the recipient of a University Teaching Award in 1989.

A native of Elkader, Iowa, Ehrhardt received a bachelor's degree from Iowa State University in 1962. He went on to the University of Iowa where he earned his law degree two years later. He eventually became an Assistant United States Attorney in Iowa before coming to Tallahassee.

Ehrhardt and his wife, the former Judy Sutton, have three children.

THE ATLANTIC COAST CONFERENCE

A Tradition of Excellence

Consistency. It's the mark of true excellence in any endeavor.

However, in today's intercollegiate athletics, competition has become so balanced and so competitive that it is virtually impossible to maintain a high level of consistency.

Yet the Atlantic Coast Conference has defied the odds. Now in its 39th year of competition, the ACC has long enjoyed the reputation as one of the strongest and most competitive intercollegiate conferences in the nation. And that is not mere conjecture, the numbers support it.

Atlantic Coast Conference schools have captured 36 NCAA and AIAW championships, including 20 in men's sports and 16 in women's competition. In addition, 69 men and 21 women have earned the coveted title of NCAA champion. On the gridiron, Maryland in 1953, Clemson in 1981 and Georgia Tech in 1990 were acclaimed national champions in football.

If success is best measured in terms of wins and losses, then the ACC is unrivaled in NCAA Basketball Tournament history. No Division I conference has posted a better record than the ACC since the NCAA's inaugural

tournament in 1938. Following Duke's dramatic national championship season of 1991, ACC teams have claimed five national championships while finishing second on eight occasions. North Carolina captured national titles in 1957 and 1982, while N.C. State walked away with the crown in 1974 and 1983.

ACC baseball is also on the rise. The nine conference baseball programs have combined to make 90 appearances in NCAA Regional play and 26 trips to the College World Series. In 1955, Wake Forest came away with the NCAA Championship to claim the ACC's lone baseball crown. Over the past five seasons, the conference has sent at least three teams to NCAA regional competition and in 1990 a league-record four schools accepted regional bids.

The major leagues have looked to the Atlantic Coast Conference as well. Nearly 400 players from the nine current member schools have been selected in the annual major league baseball draft since 1963. Former ACC players in the major leagues include B.J. Surhoff, Walt Weiss, Kevin Brown, Brian Barnes and Tim Teufel, to name

a few.

The ACC also stands at the forefront of intercollegiate athletics in terms of academic accomplishments of its student athletes. That accomplishment is nowhere better reflected than in the CFA Academic Achievement Award which is awarded annually to a CFA member institution with the highest graduation rate among members of its football team. Six times over the past 11 years, an ACC member school has claimed the award. In addition, since 1963, ACC basketball players have earned first-team Academic All-America honors 28 times.

The conference will conduct championships in 23 sports in 1991-92, including 12 for men and 11 for women.

The first ACC championship was held in swimming on February 25, 1954, while the league's inaugural basketball tournament took place March 4-6, 1954, at North Carolina State, drawing 36,000 fans over the three days. The conference did not conduct championships in cross country, wrestling or tennis during the first year.

The 12 sports for men include football, cross country, soccer, basketball, swimming, indoor and outdoor track, wrestling, baseball, tennis, golf and lacrosse.

Women's sports were initiated in 1977 with the first championship meet being held in tennis at Wake Forest, October 6-8. Championships for women are currently conducted in cross country, volleyball, field hockey, soccer, basketball, swimming, indoor and outdoor track, tennis, golf and softball.

FSU third baseman Nandy Serrano's international experiences this summer included winning a silver medal at the Pan American Games. Here, he is presented with the medal by Cuban leader Fidel Castro.
