GAME NOTES: DiBlasi, M. faced 1 batter in the 5th...**Start:** 7:07 pm **Time:** 2:34 **Attendance:** 3612

INTRODUCING EXOGRID.

EXTREME DOMINATION CONTINUES.

IT'S BEEN PROVEN IN 5 STRAIGHT NATIONAL CHAMPIONSHIPS: LOUISVILLE SLUGGER'S STIFF-HANDLE BATS OUTPERFORM THE COMPETITION'S FLEXIBLE-HANDLE DESIGNS.

Now, we've taken stiff-handle technology to a totally new level with the revolutionary, new Exogrid. See what the buzz is all about—wrap your hands around the best-performing bat ever produced by Louisville Slugger. You'll see why bats that bend don't win. And why Louisville Slugger dominates, year after year.

ONE-PIECE CONSTRUCTION

The competition's two-piece designs result in weakness at the handle/barrel joint. Our one-piece construction ensures maximum strength and better performance.

INTERNAL CARBON COMPOSITE SLEEVE

A carbon sleeve provides greater handle stiffness than aluminum, alone, ever could.

CARBON COMPOSITE INSERTS

The metal is trimmed in a grid pattern, then replaced with carbon composite inserts that are several times stronger and lighter than the original metal.

EXCLUSIVE EXOGRID FUSION PROCESS

Using heat and extreme pressure, the sleeve, inserts and metal wall are bonded to function as a single, solid unit.

ST+20 ALLOY

The toughest bat alloy available today.

WHY BATS THAT BEND DON'T WIN.

The last thing you want at the moment of contact is for your bat handle to flex. When the handle flexes, the barrel can't. That reduces your trampoline effect. A stiff handle produces more barrel flex, resulting in maximum trampoline effect and, ultimately, greater performance.

Stiff handle: Maximum performance and energy transfer.

Flex handle: Reduced performance and loss of energy.
