IMPORTANT: Most player categories are ranked on per-game average. Thus, it's vital that you consider every player (on both teams) with any statistics in any game this season (get season player statistics from both SIDs). Then list below the last name of players who have season figures but did NOT play in this game. All players with previous statistics will be charged with a game unless you indicate otherwise under DID NOT PLAY IN THIS GAME. A game played is one play—whether or not the player touches the ball. (For guidelines on a game played, refer to BI-8 in 1976 Official Football Statisticians' Manual.) If a player with first-time statistics has missed games, fill in below—after getting from his SID how many games missed.

SCORING SUMMARY

List all scoring plays in sequence. "Time left" means time remaining in the quarter. Under "play," to save you time, please use only: Rush, Pass, INT, PR, KOR, FUM, FG, or SAF (instead of writing out interception, punt, kickoff and fumble returns, field goal or safety).

On pass play, list passer first, then receiver and combined yardage of pass and

run. All plays are measured from the line of scrimmage except field-goal attempts—from the point of kick to the goal posts (goal line plus 10 yards).

After each touchdown, please continue on the same line and under "FOR EXTRA POINTS ONLY" check (✓) type of PAT (kick, pass or run) and whether good (G) or no good (NG).

1. **Introduction**
 The purpose of this report is to provide a comprehensive overview of the project's progress and to identify any challenges or risks that may arise. The report is structured as follows:
 1.1. **Project Overview**
 The project aims to develop a new software application that will streamline the workflow of the department. The project is currently in the planning phase, and the following tasks are being completed:
 1.2. **Task 1: Requirements Gathering**
 The first task was to gather requirements from the stakeholders. This was done through a series of interviews and workshops. The requirements were then documented in a requirements document.
 1.3. **Task 2: System Design**
 The second task was to design the system architecture. This was done by creating a UML diagram that shows the relationships between the different components of the system.
 1.4. **Task 3: Development**
 The third task was to develop the software. This was done by writing code in the Java programming language. The code was then tested to ensure that it meets the requirements.
 1.5. **Task 4: Deployment**
 The fourth task was to deploy the software. This was done by installing the software on the target system and configuring it to run correctly.
 1.6. **Task 5: Maintenance**
 The fifth task was to maintain the software. This was done by monitoring the system for any issues and making any necessary updates or fixes.
 1.7. **Conclusion**
 The project has been completed successfully, and the software is now being used by the department. The project was a success because it met all the requirements and was delivered on time and within budget.
